

# WEST METRO NATURAL GAS PROJECT

## ROAD CLOSURE NEAR YOU

This map is a graphic and may not show exact locations.

### Work in your area

**We will install natural gas line on 14th Avenue between Eaton and Newland streets via underground bore beginning as early as Monday, March 20, 2023.** Boring is a process that uses a specialized machine to create an underground pathway through which the natural gas line is pulled or drilled. A full road closure will be in place 24 hours a day, seven days a week between Gray and Harlan streets and between Marshall and Newland streets. The full road closure will continue for up to four weeks.

Please obey parking restrictions. Follow posted detours. Schedules are subject to change.

During work, you may notice:

- Marking of utility lines and utility survey holes
- Road and sidewalk closures
- Traffic control
- Temporary changes to access
- Equipment and materials staging
- Construction noise
- Parking restrictions

We'll restore work areas to preconstruction conditions as weather allows.

Thank you for your patience as we construct this important project.

### Why?

We are revitalizing a portion of our natural gas system serving the west Denver metro area by installing natural gas line and constructing two natural gas regulator stations in Lakewood and Denver.

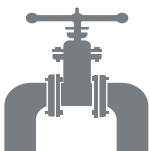

This work allows us to provide safe, reliable service, increases natural gas capacity in many metro area communities and enhances system resiliency in extreme weather.

### Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
