

WEST METRO NATURAL GAS PROJECT

CONSTRUCTION NEAR YOU

Work in your area

We will install natural gas line by boring between the intersections of 12th Avenue and Benton Street and 10th Avenue and Benton Street, beginning as early as April 8, 2024.

We will stage equipment and materials on Benton Street, between 12th and 13th avenues, and on Benton Street, between 9th and 10th avenues. We expect work to take up to three weeks.

Full and partial road closures may be in place. Please obey parking restrictions and follow posted detours. Schedules are subject to change.

During work, you may notice:

- Marking of utility lines and utility survey holes
- Traffic control
- Road and sidewalk closures
- Parking restrictions
- Construction noise
- Temporary changes to access

We'll restore work areas to preconstruction conditions as weather allows.

Thank you for your patience as we construct this important project.

Why?

We are revitalizing a portion of our natural gas system serving the west Denver metro area by installing natural gas line and constructing two natural gas regulator stations in Lakewood and Denver.

This work allows us to provide safe, reliable service, increases natural gas capacity in many metro area communities and enhances system resiliency in extreme weather.

Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
